establishment of localization
transport
catabolic process
response to chemical
vesicle−mediated transport
protein catabolic process
proteolysis involved in protein catabolic process
transmembrane transport
cellular response to chemical stimulus
monoatomic ion transport
modification−dependent protein catabolic process
ubiquitin−dependent protein catabolic process
monoatomic cation transport
monoatomic ion transmembrane transport
inorganic cation transmembrane transport
inorganic ion transmembrane transport
monoatomic cation transmembrane transport
autophagy
process utilizing autophagic mechanism
proton transmembrane transport
